

Brand Guidelines

WaPay · Please Pay Me

Version 1.0 · 31 August 2026 · for Canva and external designers

The WaPay logo

The logo is the W mark — two slanted strokes and a dot — with the WaPay wordmark, always in the brand green (#359853). It is supplied as finished artwork: never redraw, retype or recolor it.

With TM · wapay-logo-1024-TM.png

App icon / favicon · wapay-favicon-128.png

Rules

- Clearspace: keep at least the height of the W-mark's dot clear on every side.
- Minimum width 120 px (digital) / 30 mm (print); below that, use the app icon alone.
- The TM version and the plain version are both approved — pick per placement, never add your own TM.
- Never stretch, outline, shadow, rotate or recolor. Never place on low-contrast or busy backgrounds.
- On dark or photographic backgrounds, use the logo on a white rounded card, as on the cover.

Please Pay Me

Please Pay Me is WaPay's payment-request service. Its logo is the green wordmark below — Inter SemiBold in the same brand green — exactly as it appears on the pleasepayme.co.za pay screen, optionally led by the prayer-hands (please) emoji in product UI.

The image shows the 'Please Pay Me' wordmark logo in a green, rounded, sans-serif font. The letters are thick and the overall style is friendly and approachable.

Wordmark · logo-pleasepayme.svg / .png

The image shows the 'Please Pay Me' wordmark logo with a trademark symbol (TM) at the end of the word 'Me'. The font is the same green, rounded, sans-serif style as the previous logo.

With TM · logo-pleasepayme-TM.svg / .png

How the two brands relate

- Please Pay Me always appears with the credit line “with WaPay” or “Powered by WaPay” nearby.
- Standing footer wherever both appear: “Please Pay Me is a WaPay service for requesting payments on WhatsApp. WaPay is not a bank.”
- Both wordmarks are green #359853 — the shared color IS the family resemblance.
- The SVG wordmark type is outlined to paths — no font needed to open or scale it.

Color

One green family carries both brands. #25D366 is reserved for exactly one thing: the WhatsApp action button — never use it for anything else.

Typography

Everything is set in Inter. It ships free in Canva (search “Inter” in the font picker) and on Google Fonts, and the TTF files travel with this kit.

INTER SEMIBOLD · HEADLINES & UI

Get paid on WhatsApp.

INTER BOLD · EMPHASIS & NUMBERS

R20 — no fees for you.

INTER REGULAR · BODY COPY

Warm, plain, South African everyday. Short sentences. “Get paid,” “your link,” “share it.” Speak like a helpful person, not a bank letter.

Type rules

- Headlines: SemiBold 600, tight but never all-caps sentences.
- Body: Regular 400 at 14–16 px digital; keep lines under ~70 characters.
- Buttons: SemiBold 600, sentence case (“Pay from my WaPay account”).
- Wordmark text is artwork — never retype “WaPay” or “Please Pay Me” in layouts as a logo substitute.

Usage & voice

Do

- Lead with what the customer gets: “Get paid on WhatsApp”, “Buy airtime in chat”.
- One bright #25D366 WhatsApp button per screen; every other button uses the deep green.
- Keep layouts light: white cards on the soft green page background, rounded corners (12–16 px).
- Use real product screenshots from WhatsApp where possible — the chat IS the product.

Don't

- Never call WaPay a bank, or imply deposits are bank accounts. The standing line: “WaPay is not a bank.”
- Never promote betting or gambling in WhatsApp creative — web placements only, and only with sign-off.
- Never promise fee percentages or savings claims without checking current pricing first.
- Never use the old speech-bubble mark or any redrawn W — the supplied files are the only approved logos.
- Never show a customer’s number, balance or voucher PIN in creative — use obviously fake sample data.

Boilerplate

“WaPay is a digital voucher and payments service delivered over WhatsApp, operating on licensed payment rails. WaPay is not a bank or financial institution. Terms, conditions and product rules apply.”
